FOCUS ON
ESOPHAGEAL,
HEPATO- BILIARY,
RECTAL CANCERS

Gastro Intestinal Oncology is an area where better understanding of biology of the cancer, rapid strides in screening, newer treatment options in surgery, radiation and medical management is being witnessed.

Multidisciplinary management is the key to optimize patient outcomes. COG and CGC are continuing their association to bring together all the key decision makers to engage in debates and discussions on challenging aspects of GI Oncology. Presence of national faculty from GI Oncology society adds value to this meeting. Inviting postgraduates, consultants, and all those with interest in GI Oncology to make use of this opportunity in the true spirit of a “teaching day”, as learning is the only way to stay relevant!
